Summary — Quick-learning Full-Stack Developer specializing in Django, React Native, Next.js, MERN stack, and Python with expertise in REST API development and database management (MongoDB, MySQL). Passionate about building scalable and high-performance applications with a focus on security and maintainability. Seeking opportunities to contribute technical expertise and grow in dynamic environments.

Skills

Frontend React.js, React Native, Next.js, Angular, HTML, CSS, JavaScript, TypeScript, ShadCN, Magic UI	Optimization Server-side rendering (SSR), API integration, web performance
Styling Tailwind CSS, Bootstrap	Version Control Git, GitHub
	Backend Node.js, Python, REST APIs, Nodemailer
	Methodologies Agile, Code Reviews, Collaboration

Experience

Technical Trainer

June 2024 - Present

- Conducted training sessions for BTech students across various colleges, focusing on Python full stack and JavaScript full stack technologies.
- Developed and implemented curriculum to enhance students' skills in emerging technologies.
- Fostered an engaging learning environment, encouraging students to explore and innovate in tech.

Projects

AI Mock Interview Platform

React, Django REST Framework, OpenAI API

- Built a full-stack AI-powered mock interview platform with real-time question generation and feedback.
- Implemented JWT-based authentication, protected routes, and role-based access control.
- Designed APIs to store interview sessions, questions, user answers, and AI-generated feedback.
- Integrated text and speech input for answering interview questions.

Job Posting Hiring Platform

MERN Stack, Nodemailer, MongoDB

- Developed a job board platform with user registration, email verification, and job posting features.
- Implemented secure authentication using JWT and refresh tokens.
- Automated email notifications for job updates using Nodemailer.
- Followed a strict Figma-based UI design for a production-ready experience.

Real-Time Chat Application

Django, WebSocket

- Built a real-time chat application using WebSockets for instant message delivery.
- Implemented private and group chat functionality with user authentication.
- Designed a responsive and modular chat UI with React.

E-Commerce Web Application

MERN Stack / Django

- Built an e-commerce platform with product listing, cart, and order management.
- Implemented user authentication, secure payments flow, and admin product controls.
- Focused on scalable backend design and optimized database queries.

Education

GITAM University

Bachelor of Computer Applications

7.17/10 CGPA

Chandigarh University

Masters of Computer Applications

8.67/10 CGPA

Vishakhapatnam, India

Oct 2021 - April 2024

Mohali, Chandigarh, India

July 2024 - June 2026

Certifications

Introduction to Front-end Development

April 2024

Introduction to Back-end Development

April 2023

Django Web Framework

May 2023

Introduction to Databases for Back-end Development

Mar 2023
